

New moon #1
Stephanie Meyer

This is one of the most confusing love stories ever but the way the author wrote it, you understand every part. What really drew me into this book was the steamy love triangle between Bella, Edward and Jacob. Each of them so different with Edward being a vampire, Jacob being a werewolf and Bella being human. While both boys are fighting for Bella's love she fights to find herself. Being drawn in by her weaknesses she fights to save the ones she loves. The only thing hotter than this book is Jacob.

Pretty little liars #2

They thought she was gone forever when she went missing that late summer night. Although she was Emily, Hanna, Aria and Spencer's best friend they all knew that when she was gone so were there secrets. Every little oops, or flaw that haunted them was gone because Alison was the one they trusted with there secrets, although she kind of kept them some times she'd make you tell. She was also the one who went missing that night. And she never came back, no secrets where spilt well for three years that is. Now the gang has split up, and things have quieted down. But the girls have just started getting these weird texts from "A" that threaten to tell everyone there secrets.....but Alison was only one who knew that. Could the thing that tore them apart be the thing that brings them back? This is a really great book; it'll have you up all night just to finish it!

Percy Jackson is about to be kicked out of boarding school . . . again. His life was never perfect but it was kind of better when he lived with his mom he still sees her but it's just not the same. But lately things have been getting worse and worse, mythological monsters seem to be coming straight out books. And he's made a couple more than angry. To become not hated he has to find Zeus's stolen lighting bolt, but he's the prime suspect. This is a really good book, I've learned so much in a fiction book ever. There where so many exciting parts, each of them chasing one another after each other.

Angles turn their backs #9

Margaret Buffie

This is the strangest book I've ever read! The book itself told the UN-tell able story of being less than normal. There this girl Addy and her mother a father got a divorce; her mother and her are living in Toronto. Addy has often spas attacks, so she just stays in her house when people bring her, her homework. When she hears some noise in the apartment across the hall she never wants to look back. But her landlord asks her to clean it out so he can sell it. Apparently the lady who used to live there died, now Addy thinks she see her ghost. This book is very . . . different. But I love it! It's scary, funny and kind of depressing, but you can't stop reading.
